GASTON SENAC

SOFTWARE DEVELOPER

NZQA Level 6 Certificate
Dev Academy Aotearoa

I'm a software engineer with Full Stack experience, based in Christchurch, with 22 years of experience in IT as a System Engineer, including 3 years as a Manager.

Recently I have obtained a Level 6 Certificate in Applied Software Development. During my studies, I thoroughly enjoyed the Human Skills module, which emphasised the importance of communication and collaboration, with plenty of practice on giving and receiving feedback, conflict resolution and retrospective analysis.

I have also gained valuable experience working on projects (collaborating with a team of 6 developers), doing pair programming and following Agile methodologies.

There was a big emphasis on code quality and testing. This experience has helped me develop a strong understanding of the software development lifecycle and the importance of delivering high quality code and integrating testing from day one.
